SUMMARY

Front-end tech lead with **9+ years of production Angular, from AngularJS to Angular 22** across cybersecurity, fintech and banking (HUB Security, eToro, Discount Bank). Lead a 4-engineer team and shipped LLM-powered workflows that cut new-screen delivery time by **~30%**. Founder of **Frontuna.com**, a solo-built AI UI generator for 4 frameworks with **500+ users** and 5,000+ generations.

Highlights: 30M+-user fintech platform · 60+ landing pages in 20+ languages · ~25% smaller bundles · 70% test coverage · full AI SaaS built solo

CORE SKILLS

- **Front-End:** Angular 8 → 22 (Signals, standalone components, control flow, @defer, OnPush), TypeScript, RxJS, NgRx, Angular Material, React, Next.js, SCSS, Tailwind, design systems, WCAG 2.1, Core Web Vitals
- **AI / LLM:** OpenAI API, prompt engineering & prompt pipelines, streaming responses, LLM-powered UI and code generation, agentic workflows, Cursor, Claude Code (subagents, hooks, MCP)
- **Testing & Quality:** Jasmine/Karma, Jest, Cypress, Playwright, code review, CI quality gates
- **Back-End & Cloud:** Node.js, Express, REST APIs, PostgreSQL (Prisma, Neon), MongoDB, Google Cloud Run, Vercel, AWS, Kubernetes, CI/CD (GitHub Actions, Jenkins)
- **Ways of Working:** technical leadership, mentoring, architecture decisions, cross-functional delivery with product, design and security, Agile/Scrum

EXPERIENCE

HUB Cyber Security (Hub Security), Tel Aviv

Apr 2024 – Present

Senior Front-End Developer (Tech Lead) · cybersecurity, B2B enterprise

- Lead front-end architecture for **3 B2B security web applications** (Angular 20 → 22, TypeScript, Signals, standalone components), guiding a team of 4 engineers through bi-weekly releases.
- Designed and shipped a reusable AI-integration layer on the OpenAI API — streaming, prompt versioning, fallbacks and output validation — embedded in all 3 applications, automating analyst workflows and cutting manual review time by **~40%**.
- Rolled out AI-assisted development (Cursor, Claude Code, shared prompt systems) across the team, reducing average delivery of a new screen by **~30%** across 20+ features.
- Migrated 15+ modules to standalone components and Signals with OnPush change detection, shrinking the initial bundle by **~25%** and improving page load by **~35%**.
- Introduced unit and E2E quality gates in CI, raising front-end test coverage from **~20%** to **70%** and reducing production UI defects by **~30%**.
- Mentor 3 developers through 30+ code reviews a month and own front-end architecture decisions (state management, shared component library, LLM integration pattern), partnering with product, design, back-end and security teams on every release.

Frontuna.com — Founder & Sole Engineer

2025 – Present

AI-powered UI component & landing-page generator · side venture, freemium SaaS

- Built and run a SaaS that turns plain-English prompts into production components for **4 frameworks** (React, Angular, Vue, Svelte) — **500+ registered users** and **5,000+ generated components**.
- Architected the full stack solo across 6 managed services — Angular on Vercel, Node/Express/TypeScript on Google Cloud Run, Prisma + Neon PostgreSQL, Paddle billing, Resend, Vercel Blob — at **99.5%+ uptime**.
- Designed a multi-step prompt pipeline with validation and framework-specific post-processing, plus live sandboxed preview and per-user design memory, raising compile-ready first output to **~90%**.
- Shipped an automated onboarding email sequence; repriced plans (10-generation free tier, annual billing by default) to lift free-to-paid conversion.

- Ran go-to-market across 4 channels (Product Hunt, Reddit, Reddit Ads, X) with end-to-end affiliate tracking, using an agentic workflow (Claude Code subagents, hooks, MCP) to ship **100+ releases** as a single engineer.

eToro, Tel Aviv

Mar 2022 – Mar 2024

Senior Front-End Developer — Marketing Technology · *global multi-asset trading platform, 30M+ registered users*

- Built and optimized **60+ high-traffic landing pages** (Angular 14, TypeScript, SCSS) in 20+ languages, raising Lighthouse performance scores from ~60 to **90+** and lifting sign-up conversion by ~15%.
- Created a reusable landing-page and email-template component kit adopted by **10+ regional marketing teams**, cutting campaign page turnaround from ~5 days to 1 day.
- Improved responsiveness and cross-browser support across the company's mobile web platforms, reducing browser-specific bugs by ~40%.

Aman Group, Tel Aviv

Jul 2017 – Mar 2022

Senior Web Client Developer · *IT services for Israeli banks, incl. Discount Bank*

- Developed Discount Bank's customer-facing web application, used by **hundreds of thousands of customers**, across 10+ major releases on AngularJS 1.5 → Angular 8 → Angular 12 and TypeScript.
- Led the AngularJS → Angular migration of **40+ screens** with zero critical production incidents, reducing load time by ~30%.
- Led front-end design and pre-planning of **5 greenfield enterprise web apps**, delivering MVPs in 8–12 weeks.

Matrix Digital (Matrix Israel), Tel Aviv

Aug 2016 – Jul 2017

Senior Web Client Developer · *IT services*

- Delivered 10+ client web projects (HTML/SCSS, JavaScript, Bootstrap, .NET/C# back ends) for enterprise clients.

Earlier roles: Front-End Developer, Ness SES · Web Client Designer/Programmer, Kenes International · Web Developer, Zarmon Goldman DDB

SELECTED PROJECTS

- **MammyZone** (mammyzone.co.il, 2026) — Built the full homepage and a Next.js 14 App Router scaffold with TypeScript, Tailwind and i18n for a consumer startup, using structured AI-assisted (Cursor) delivery.
- **Frontuna Developer Toolkit** — 8 free developer tools (launch blueprint, competitor-gap and market-gap scanners, idea validator) built on the same LLM pipeline to drive product-led acquisition.

CERTIFICATIONS & EDUCATION

- Certified Software Architecture — DevOps Experts College (2024)
- Certified Full-Stack Developer, MERN (React & Node.js) — Yaniv Arad College (2023)
- Diploma in Software Development, C# & .NET — John Bryce College
- Management & Computer Science studies — Open University of Israel
